

# Typical Properties of Mn-Zn Ferrite Sheet

| GRADE                           | FLX-P12X     | FLX-P12Z     |
|---------------------------------|--------------|--------------|
| Materials                       | MnZn Ferrite | MnZn Ferrite |
| Max. Size(mm)                   | □140 x125    | □140 x125    |
| Thickness(mm)                   | 0.08~0.20    | 0.08~0.20    |
| $\mu'$ @100kHz                  | 1000         | 600          |
| $\mu''$ @100kHz                 | 8            | 6            |
| Bm(mT)                          | 480          | 480          |
| Pcv(mW/cc) @25°C, 200mT, 100kHz | 700          | 700          |
| Remark                          |              |              |

## $\mu$ -f Characteristics
